ABOUT ME

Senior Backend Engineer with 8+ years building scalable REST APIs and distributed systems across ad-tech, HR-tech, and e-commerce. Deep expertise in Python/Django; growing proficiency in Java/SpringBoot. Proven record leading features in high-growth, fully remote SaaS products.

EXPERIENCE

Senior Backend Engineer

SunnyData AI

Uruguay (Remote)
Aug 2025 – Present

- Develop FastAPI and SpringBoot services for Kroger’s 8451 Ad Platform, enabling campaign and ads management across all Kroger retail sites.
- Configured Azure secrets, GitHub Actions, and Terraform pipelines for CI/CD; authored Postman contract tests to enforce API contracts across services.

Stack: Python 3.8+, FastAPI, Java, SpringBoot, Kubernetes, Azure, Redis, MongoDB

Senior Software Engineer

UKG – Employee Voice

Uruguay (Remote)
Jan 2023 – Jul 2025

- Led REST API development for UKG Pro’s Employee Voice survey tool, building automation rules for survey triggering, participant generation, and multi-channel invite delivery.
- Re-architected Celery Beat pipelines for survey tracking and aggregation, improving processing throughput.
- Designed a Java 21 + SpringBoot service layer to migrate the legacy Employee Voice platform to a centralized, standards-compliant data service.

Stack: Python 3.8+, Flask, Java, SpringBoot, AngularJS, Redis, MySQL, MongoDB, Celery, Kubernetes, GCS

Backend Developer

Smart and Fun – PlusHolidays

Uruguay (Remote)
Nov 2019 – Sep 2022

- Built REST API services for a Spanish holiday reservation platform, delivering full-CRUD modules for Accommodations, Notifications, and Settings.
- Integrated Inter Home Group and Avantio VRMS for real-time booking and accommodation synchronization; implemented Celery tasks and WebSocket notifications for async events.

Stack: Django 3, DRF, Python3, PostgreSQL+PostGIS, Redis, Celery

Full-Stack Developer

Locomotion Technologies – WHATISHOT

Uruguay (Remote)
Jan 2017 – Aug 2022

- Built an async search module via Django-RQ capturing user behavior data across filter forms, and integrated Google Merchant Center to generate Google Shopping product feeds.
- Implemented SendGrid webhook handlers, Meta SEO for product pages, and wrote unit tests covering models, forms, serializers, views, and utilities.

Stack: Django 2.2, DRF, Python3, Docker, AWS S3, PostgreSQL+PostGIS, Redis, JavaScript, jQuery

SKILLS

Languages & Frameworks: Python3, Django, DRF, FastAPI, Flask, Java, SpringBoot, JavaScript, jQuery **Databases & Messaging:** PostgreSQL, MySQL, MongoDB, Redis, Celery **Infrastructure:** Docker, Kubernetes, Azure, GCS, AWS S3
Methods: REST API Design, Scrum, Git

EDUCATION

Universidad de las Ciencias Informáticas

Computer Science Engineer

La Habana, Cuba
2011 – 2016

CERTIFICATIONS

PCAP™ – Certified Associate Python Programmer

Mar 2024 – OpenEDG / Python Institute

Scrum Fundamentals Certified

Jul 2021 – SCRUMstudy
